Title: tblVIS - Basic follow-up/visit related data

Subject: HICDEP - Hicdep_1.30/TableVis

Version: 2

Date: 08/18/18 14:16:41

Table of Contents

tbIVIS - Basic follow-up/visit related data	3
Core fields	3

tbIVIS - Basic follow-up/visit related data

holds visit related information, weight, wasting.

Core fields

Note: Fields marked **bold** form the unique identifier for a record of the table.

- **PATIENT**: Code to identify patient (Cohort Patient ID)
- **VIS_D**: Date of patient visit
- **WEIGH**: Weight of patient at visit
- **GAIN_Y**: Is the patient gaining fat in the abdomen, neck, breast or other defined locations?
- **LOSS_Y**: Is the patient experiencing loss of fat from extremities, buttocks or face?

Depending on the collaboration this data might be collected in intervals of a year, e.g. from July last to July this year. In that case all visit dates or a fixed number of visit dates for that period should be gathered, if the patient did not have a visit in the defined period, a record with the PATIENT id and empty fields for VIS_D etc. should be included.
